

HVA Quick Guide: Navigating Routific Beta for Regional Scheduling Drop-offs

Welcome to the team! This guide will walk you through the **"Unified Route"** method in Routific Beta. This process is critical for maximizing carpooling efficiency and maintaining our "Architect" phase standards.

Step 1: Regional Workspace Selection

Before entering any data, ensure you are in the correct regional project. Cross-reference the calendar with our **Mandatory Service Days**:

Region	Operating Days	Service Focus
SoCal	Tue – Fri	Tue: Blood Only / Wed-Thu: Both / Fri: Overflow D/O
NorCal	Thu – Fri	Thu: Blood Only / Fri: D/O Only
Reno	Mon – Tue	Mon: Blood Only / Tue: D/O Only

Step 2: Initial Setup (Phase I - The Unified Route)

Goal: Place all tasks on the Technician's itinerary first to create one efficient path.

1. **Add Stops:** Upload or manually enter all Blood Draws and Drop-offs (D/O).
2. **Assign to Technician:** Initially, assign **ALL** stops to the **Field Technician's** route.
3. **Set Time Windows (Strict Policy):**
 - o **Blood Draws:** Set the duration/service time to **1 hour**.
 - o **Drop-offs (D/O):** Set the duration/service time to **2 hours**.
4. **Optimize:** Click the **"Optimize"** button. Routific will now calculate the most efficient path for the Technician and Courier who are carpooling together.

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

Step 3: Validation & The "No-Gap" Check

Before separating the routes, do a visual audit of the map and timeline.

- **Check for Gaps:** Ensure there are no large geographical jumps between a Blood Draw and a D/O.
- **Customer-First Verification:** Ensure the patient is already created in the system before the order is generated in Routific.
- **Approval:** Once the route looks "seamless," wait for the final confirmation that no more appointments will be added for that day.

Step 4: Route Separation (Phase II - Courier Handover)

Goal: Separate the tasks to keep the Technician's schedule clean and save on Routific "Free Order" credits.

1. **Select Drop-off Stops:** Locate the D/O appointments currently on the Technician's timeline.
2. **Move to Courier:** Use the "Move to Driver" function to shift all **confirmed D/O stops** to the **Courier's separate route**.
3. **Final Review:** * The **Technician** should now only see Blood Draws.
 - The **Courier** should now see all Drop-offs.
4. **Dispatch:** Click "**Dispatch to App**" to send the final itineraries to the team in the field.

HVA Pro-Tips for Audit Readiness

- **The 5 Identifiers:** Always double-check that the patient's ID details are correct in the "Notes" section of each stop.
- **Look Twice, Click Once:** Accuracy in the Beta platform is permanent. Verify the date and region twice before optimizing.

- **Wednesday Handover:** If you are assisting in SoCal, ensure the Wednesday "Proper Endorsement" notes are updated in the route comments for the Manager to see.

Support: If you encounter a conflict in the time windows or a route seems inefficient, escalate to the **Clinical Front-end & Field Technicians Manager** immediately. Do not bypass this step by going to the CEO.
