

Onboarding Guide: Clockify Browser Extension for HVAs

This guide is designed to help you integrate Clockify into your daily workflow. Following these steps ensures accurate time tracking and seamless synchronization with our project management tools.

Step 1: Install the Extension

1. **Download:** Open your Google Chrome browser and visit the [Clockify Chrome Web Store](#).
2. **Add to Chrome:** Click the **Add to Chrome** button, then confirm by selecting **Add Extension** in the pop-up.
3. **Pin for Visibility:** Click the **Puzzle Piece icon** (Extensions) in the top right corner of your browser. Find **Clockify Time Tracker** and click the **Pin icon** next to it so it stays visible on your toolbar.

Step 2: Account Activation

1. **Check Email:** Open your company-provided email and look for an invitation from **Clockify**.
2. **Accept Invite:** Click the activation link to join the company workspace.
3. **Sign In:** Click the **Clockify icon** in your browser toolbar and log in using your company credentials.

Step 3: Optimization & Settings

To maintain professional standards, please configure the following in the extension settings (found by clicking the **≡ Menu** inside the extension):

- **Idle Detection:** Set to **5 minutes**. This ensures that if you step away from your desk, the system will prompt you to "discard" or "keep" the inactive time.
- **Reminders:** Enable reminders to alert you every **30 minutes** if your timer is not running during active shift hours.
- **Default Project:** If you work primarily on one area (e.g., *Clinical Operations*), set it as your default to save time.

Step 4: Using the Trello Integration

As part of our workflow, Clockify is integrated directly into **Trello**:

1. Open any **Trello Card** assigned to you.
2. Look for the "**Start Timer**" button that now appears inside the card.
3. Clicking this button will automatically start your timer and sync the **Trello Card Title** as your Clockify description.

HVA Expectations & Protocols

- **Real-Time Tracking:** We prioritize live timers over manual entries to ensure data integrity.
- **Detail-Oriented Logs:** Your "What are you working on?" field should be specific (e.g., "Updating Patient Intake SOP" instead of just "Work").
- **Shift Close:** Always ensure your timer is stopped before logging off for the day.
