

Standard Operating Procedure: Scheduling Coordinator: Professional Operations & Dialogue Guide

Version: 1.0

Effective Date: April 10, 2026

Review Date: March 21, 2026

Scope: Clinical Operations & Administrative Staff

Purpose:

This guide serves as the standard operating procedure for all patient eye assessment interactions at Enrich. It balances efficient data collection with high-touch patient care.

HVA Coordinator Guide: Patient Eye Assessment Workflow

As a Coordinator, your goal is to guide the patient from their first inquiry to a clinical recommendation. Precision and rapport are key.

Scenario: When the patient is **NEW** to our service and does not have a prescription from a doctor and wants to avail our service out of their pocket. Patient willing to proceed patient eye assessment with one of our clinicians who is designated to issue, identify or determine the correct concentration recommendation for the patient.

Phase 1: The "Gatekeeper" Protocol (Data Collection)

Before discussing symptoms, you must secure these 5 identifiers to ensure HIPAA compliance and create the patient's official chart.

Identifier	Requirement	Purpose
1. Full Name	Legal name as it appears on ID and Trello px's card.	Official Charting.
2. Phone Number	Primary mobile or home.	Logistics & Tech Dispatch.
3. Date of Birth	MM/DD/YYYY.	Age-specific clinical assessment.
4. Address	Full street, city, state, zip.	Determining "Draw" location.
5. PID Creation	Create unique Patient ID (e.g., EN-2026-001).	Internal tracking.

Note: Never provide services to "anonymous" leads. The PID must be generated in the EMR immediately.

Patient intake Call script:

The "Gatekeeper" Protocol (Data Intake)

Start here to ensure the lead is used ethically and is HIPAA-compliant.

The information is intended to be for the addressee only. If you are not the addressee, any disclosure, copying, distribution, or use of the contents of this message is prohibited. If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

- **Greeting:** *"Hi [Patient Name], I'm calling to help you finalize your eye assessment so we can get your recommendation back from the clinical team as quickly as possible."*
- **Full Name:** *"To start your official chart, could you please provide your full legal name as it appears on your ID?"*
- **Date of Birth:** *"And what is your date of birth?"*
- **Contact Info:** *"What is the best mobile number for us to use for logistics and tech dispatch?"*
- **Location:** *"Could you provide your full address? This helps us determine the best 'Draw' location for your blood work."*

Phase 2: Delivery Methods

You have two ways to complete the assessment.

Note : Route A is preferred as it builds better rapport.

The Assessment Transition :

"Thank you. I have initiated your patient file in our system. To get your recommendation back as quickly as possible, we have two ways to complete your Eye Assessment. Which one would you prefer?"

Option 1: Over the Phone (Recommended)

"We can go over the assessment right now. I'll ask you the relevant questions regarding your symptoms, history, and pain levels, and I'll type your answers directly into your file for the doctor. This is usually the fastest way to get your results."

Option 2: Email (Self-Serve)

"Alternatively, I can email the Patient Eye Assessment form to you. You can fill it out at your own pace and send it back. Once you submit it, the form will automatically link to the chart I just created for the clinician's review."

The Closing

"Once the assessment is finalized—whether we do it now or via email—the file moves to our clinical loop. A clinician will review your history to issue your Eye Drop Percentage Recommendation (such as 20%, 50%, or 100%).

As soon as we receive that percentage, I'll call you back to finalize your 'Draw' appointment and take care of the payment.

Which option works best for you today?"

Phase 3: The Clinical Interview (What to Ask)

When filling out the **Patient Eye Assessment form**, ensure every field is **"Filled Completely"**.

Ask the following:

ENRICH ADVANCED EYE CARE

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

- **Symptoms:** *"Could you please describe the symptoms you've been experiencing, such as dryness, burning, or redness?"***Duration:** *"How long have you been dealing with these symptoms?"*
- **Diagnosis:** *"Have you seen a doctor for this, or have you received a specific diagnosis, like Sjögren's syndrome?"*
- **Treatment History:** *"What treatments have you tried so far? For example, have you used Restasis, Xiidra, or over-the-counter drops?"*
- **Surgical History:** *"Have you had any recent eye surgeries, like LASIK or Cataract surgery?"*
- **Goals:** *"What are you looking to achieve most from using autologous serum tears?"*
- **Pain/Dryness Scale:** *"On a scale of 0 to 10—where 0 is no pain and 10 is the most severe—what level of pain or dryness are you feeling?"*

Phase 4: Closing the Loop

1. **Submission:** Flag the file as "Assessment Complete." in Trello platform.
2. **Notification:** Send the file to the reviewing processing center.
3. **The Output:** Inform the clinician who will review the history and issue a Serum Concentration Recommendation (e.g., 20%, 50%, or 100%).
4. **Finalize:** Once you receive the percentage, call the patient to schedule their "Blood Draw" appointment.

HVA Rebuttal & Objection Handling Guide

Objection 1: "I'm too busy to do this right now."

- **Goal:** *Pivot to Route B while ensuring the PID is created first.*
- **The Script:** *"I completely understand. I've already initiated your patient file in our system, so we don't lose any time. I'll email the form over now. Once you submit it, it automatically links to your chart for the clinician to review your history and issue your eye drop percentage."*

Objection 2: "Can't you just send me the price first?"

- **Goal:** Explain why the assessment is required for pricing (Serum Concentration).
- **The Script:** *"I wish I could give you a flat rate, but because these are custom-made from your own serum, the cost depends on the concentration the doctor recommends—anywhere from 20% to 100%. We need to know your symptom severity and medical history (like Sjögren's or past surgeries) to give you an accurate quote."*

Objection 3: "Why do you need my full address just for a form?"

- **Goal:** Connect the address to the logistics of the "Draw".
- **The Script:** *"Great question! We use your address to locate the nearest 'Draw' site or mobile technician for your blood collection. This ensures that once the clinician approves your assessment, we can get your appointment scheduled immediately."*

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

Objection 4: "I've already told my doctor all of this."

- **Goal:** *Emphasize the specialized nature of Autologous Serum Tears.*
- **The Script:** *"I understand, but our processing center needs this specific assessment to determine the exact serum concentration required for your relief. It only takes about 3 minutes over the phone, and I can type your answers directly into the file for you."*

Coordinator "Pro-Tips" for High Conversion

- **Assume the Phone Call:** Instead of asking *"Do you want to do this over the phone?"*, try: *"I have your file open now, let's go ahead and knock these questions out so we can get your recommendation back today."*
- **The "Symptom" Hook:** If they seem hesitant, ask one clinical question first: *"On a scale of 0-10, how much dryness are you feeling today?"* Once they answer, they are usually more willing to finish the rest of the form.
