

Standard Operating Procedure: Insurance Reimbursement

SOP ID: ENR-FIN002

Version:1.0

Review Date: April 10, 2026

Effective Date: April 10, 2026

Scope: Clinical Operations & Administrative Personnel

Purpose and Strategic Objective

To provide the Care Coordination team with tactical guidance for managing patient insurance expectations and facilitating reimbursement requests. While autologous therapies are typically out-of-pocket, this SOP ensures that all documentation—specifically the **Letter of Medical Necessity (LMN)** and **Detailed Receipts**—is data-driven, accurate, and professional.

The 5-Identifier Rule (Mandatory Data Accuracy)

Operational Mandate: Before facilitating any documentation requests, sharing clinical assessment data with a physician’s office, or discussing billing details, the coordinator **must** confirm the patient’s file contains 100% accurate data for the following five points:

- 1. **Full Name**
- 2. **Phone Number**
- 3. **Date of Birth**
- 4. **Address**
- 5. **PID (Patient ID)**

Insurance & Reimbursement Strategy

The "Out-of-Pocket" Reality

Staff must be transparent: Autologous eye drop therapy is typically not covered by most commercial insurance providers.

- **The Tactical Alternative:** Emphasize the use of **HSA (Health Savings Account)** or **FSA (Flexible Spending Account)** funds. Enrich accepts these cards as a direct form of payment. **Tactical Coding Reference**

All documentation and verbal guidance must utilize the following CPT codes:

- **Autologous Serum Tears: CPT 92499**
- **PRP Eye Drops: CPT J3590**

DISCLAIMER: This electronic information and all contents contain information from ENRICH ADVANCED EYE CARE which may be privileged, confidential, or otherwise protected from disclosure. The information is intended to be for the addressee only. If you are not the addressee, any disclosure, copying, distribution, or use of the contents of this message is prohibited. If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

Mandatory Regulatory Disclosures

When discussing insurance or reimbursement with a patient, the following transparency points must be explicitly communicated to manage expectations and ensure legal compliance:

- **Non-FDA Status:** Explicitly inform the patient that Serum and PRP eye drops are **not FDA approved** in the U.S. due to their nature as personalized blood components.
- **Facility Designation:** Clearly state that Enrich is **not a Pharmacy**. We are a **Processing Center** that strictly handles autologous blood components.
- **Absence of NDC/RX:** Because the product is not FDA approved, a National Drug Code (NDC) and a standard Prescription (RX) number **do not exist**.

Reimbursement Support Protocol

✓ **Technical Identifiers for Claims**

Instruct the patient to use the following data points for their manual reimbursement forms:

- **Enrich NPI #:** 1568282960
- **CPT Code:** 92499 (Unlisted ophthalmological service or procedure)
- **Pharmacy Section:** Instruct the patient to add **Enrich Advanced Eye Care** information in the "Pharmacy" or "Provider" section of their claim form, noting that the insurance company will handle the internal classification from there.

✓ **Representative Signature & Verification**

Tactical Communication: The "Immediate Call" Mandate

Because insurance claims are crucial to the company’s reputation and credibility, any inquiry regarding a claim must be handled with urgency.

- **Action:** **Call the patient immediately** upon receiving a reimbursement inquiry.
- **Goal:** Provide verbal clarity on the "Processing Center" status and guide them through the technical coding (NPI/CPT) to prevent filing errors that could lead to claim rejection.

Standardized Transparency Script

"I want to be completely transparent regarding your insurance claim. Because our Serum and PRP eye drops are customized from your own blood components, they are not FDA approved, and as such, an NDC or RX number does not exist. Please note that Enrich is a Processing Center, not a pharmacy. However, many insurance companies are now accepting these claims. To file your request, please use our NPI number 1568282960 and CPT code 92499. Simply list our company information in the provider/pharmacy section of your form. Once you have filled those details in, I will review them and affix my signature to verify your interaction with us today."

Letter of Medical Necessity (LMN) Protocol

Facilitation Checklist

To support a patient's LMN request, the Care Coordinator must assist the referring physician (Ophthalmologist or Optometrist) by providing the following data:

- **Clinical Evidence:** Summarize the **Patient Eye Assessment**, highlighting symptom severity (0–10 scale) and history of failed conventional treatments (e.g., Restasis, Xiidra, Punctal Plugs).
- **Specific Diagnosis:** Ensure the LMN explicitly states the condition (e.g., Sjögren's Syndrome, Neurotrophic Keratopathy, or Persistent Epithelial Defects).
- **Clinical Justification:** Explain how autologous drops provide essential growth factors and anti-inflammatory properties that standard lubricants lack.

Escalation Path

If a physician's office reports friction or requires clinical justification beyond the standard assessment, the request must be escalated to the **Clinical Operations Lead (Level 3)**.

Financial Documentation & Detailed Receipts

Receipt Generation

- **Timing:** Card charges occur on the day of service after completion.
- **Delivery:** Once payment is successful, the coordinator emails the detailed receipt to the address in the patient profile.
- **Content Standards:** Receipts must include the **5 Identifiers** and the specific **CPT Codes (92499 or J3590)** to assist with manual reimbursement or HSA/FSA proof of expense.

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

HSA/FSA Pre-Authorization Warning

Coordinators must inform patients that HSA/FSA cards may decline if the issuer does not recognize the merchant. **Tactical Advice:** Recommend the patient contact their issuer to authorize Enrich prior to the transaction.

Standardized Patient-Facing Scripts

For Insurance Inquiries:

"While our regenerative therapies are generally an out-of-pocket investment, many of our patients use their HSA or FSA funds seamlessly. We will provide you with a detailed receipt containing the necessary CPT codes (92499 for Serum or J3590 for PRP) to help you submit a claim for potential reimbursement. We recommend speaking with your doctor about a 'Letter of Medical Necessity' to strengthen your case."

For LMN Guidance:

"To help your doctor draft the strongest possible Letter of Medical Necessity, we will provide them with the clinical data from your initial Eye Assessment. When you contact them, please ensure they include your specific diagnosis and CPT code 92499 for Serum or J3590 for PRP."
