

Standard Operating Procedure: Jibble Time Doctor Installation Guide

Version: 1.0

Effective date: April 10, 2026

Review Date: April 08, 2026

Scope: Clinical Operations and Administration

Purpose:

The primary objective of this SOP is to establish a unified and high-integrity framework for time tracking and productivity monitoring through the mandated use of the Jibble Desktop Application. By transitioning from web-based tracking to a robust desktop-integrated system, the organization ensures 100% accuracy in labor records, providing a verified "Source of Truth" for payroll processing. This protocol is designed to eliminate manual discrepancies, protect the company's operational data, and ensure that every billable hour is accounted for through validated system activity.

Executive Note/Remarks:

This mandate is the result of a careful review and firm decision by the CEO and Founder to instill a culture of equality and fairness across the entire organization. As the company enters a phase of strategic expansion, maintaining a high standard of professional integrity is paramount.

Installation & Configuration Guide: Enabling Screen Capture for Jibble Desktop

To ensure full compliance with the organization's integrity standards and to guarantee that your worked hours are accurately recorded for payroll, please follow this specific installation guide for enabling screen capture.

1. Initial Activation via the Jibble App

Once the **Time Tracking Settings** have been enabled by the Clinical Operations Lead, all members using the desktop app must authorize access.

1. **Launch the App:** Open the Jibble desktop application on your computer.
2. **Log In:** Enter your official company-provided email and password.
3. **Start the Timer:** Click on the **green play button** to begin tracking your time.
4. **Accept the Prompt:** A system message will appear requesting permission for screen capture. Click **Allow**.

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

2. Device-Level Permissions (System Settings)

Depending on whether you are using Windows or macOS, your operating system may require an additional layer of permission to record the screen.

For macOS Users:

1. **System Prompt:** You may see a message stating "Jibble would like to record this computer's screen."
2. **Open Settings:** Click **Open System Settings** (or System Preferences).
3. **Privacy & Security:** Navigate to **Privacy & Security > Screen Recording**.
4. **Toggle Access:** Find **Jibble** in the list and toggle the switch to **On**.
5. **Restart App:** You may be prompted to "Quit & Reopen" Jibble for the changes to take effect.

For Windows Users:

1. **Administrative Rights:** Ensure you have clicked "Allow" on any User Account Control (UAC) prompts that appear when launching the app.
2. **On-Screen Instructions:** Follow the automated prompts provided by the Jibble installer to grant the app permission to capture active window titles and desktop screenshots.

3. Critical Compliance Notes

- **Mandatory Enforcement:** If screen capture is enforced in the settings, the system will **block you from tracking time** until access is granted.
- **Payroll Impact:** Since your billable hourly rate depends entirely on these logs, failing to allow screen capture will result in unrecorded (and therefore unpaid) time.
- **CEO Mandate:** This requirement is a firm decision by the CEO to ensure equality, fairness, and professional integrity as the company expands.

4. Compliance & Payroll Integration

- **Payroll Basis: No Track, No Pay**
- **The Jibble time tracker serves as the sole basis for the payroll system.**
- **All billable pay is strictly based on the time recorded via the tracker. * Important:** Without time tracked through the mandated desktop system, there will be **no pay** issued for those hours. It is the employee's responsibility to ensure the system is running correctly.

5. Administrative Monitoring & Verification

Note on Visibility: Please be advised that all installation progress and the status of screen monitoring (enabled or disabled) are **tracked in real-time on the administrative end**. The administration can verify if an employee has failed to enable the screen capturing feature. Full functionality of the Jibble system is required for the time logs to be considered valid for payroll.

Verification Step: After clicking "Continue" in the settings, attempt to start your timer again. If the green play button turns into a red stop button without further prompts, your configuration is successful.
