

Standard Operating Procedure: The Foundation

Version: 1.0

Effective Date: April 10, 2026

Review Date: April 08, 2026

Scope: Clinical Operations & Administrative Staff

Foundation:

This foundation context serves as the authoritative framework for **Enrich's** operational and clinical excellence. It establishes the "why" and "how" behind our specialized regenerative therapies, ensuring every team member aligns with our mission of high-touch, patient-centric care.

Section 1: Foundational Governance

1. Purpose

The purpose of this SOP is to establish a standardized, high-performance workflow for the intake, production, and mobile delivery of autologous eye drops (Serum Tears and PRP). This document ensures:

- **Clinical Efficacy:** Maintaining the biological integrity of growth factors, albumin, and regenerative proteins through strict "Cold Chain" management.
- **Patient Safety:** Adherence to **OSHA** aseptic and sterile techniques to prevent microbial contamination and systemic inflammation.
- **Regulatory Compliance:** Full alignment with **HIPAA** for the protection of Patient Health Information (PHI) and **ISO** audit standards for process consistency.
- **Service Excellence:** Delivering a "concierge" experience that prioritizes patient comfort, hydration, and clear communication.

2. Scope

This SOP applies to all Enrich personnel involved in the lifecycle of autologous eye drop therapy, including:

- **Administrative/Coordinators:** Handling intake, scheduling, and financial processing.
- **Clinical Technicians:** Responsible for mobile on-site collection, patient education, and disclaimer execution.
- **Processing Team:** Responsible for the laboratory separation of serum/plasma and the individual batching of patient samples.
- **Logistics:** Managing the quality-controlled storage and 48–72 hour delivery window.

DISCLAIMER: This electronic information and all contents contain information from ENRICH ADVANCED EYE CARE which may be privileged, confidential, or otherwise protected from disclosure. The information is intended to be for the addressee only. If you are not the addressee, any disclosure, copying, distribution, or use of the contents of this message is prohibited. If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

Strict Chain of Command & Escalation (Zero-Bypass Policy)

To ensure a better communication flow and to prevent any overstepping or bypassing of designated departmental roles, the following hierarchy must be strictly adhered to:

- **Mandatory Escalation Path:** All concerns arising from each department end—**specifically front-end patient concerns**—must be escalated to the **Clinical Front-end & Field Technicians Manager first**.
- **Strategic Proposals:** Any revisions to strategic proposals or updates based on "coexisting tribal knowledge" must be escalated to the **Clinical Operations Lead** for vetting.
- **CEO Protection:** Direct reporting to the CEO (CJ Johnson) is strictly prohibited unless specifically requested. This ensures the CEO is not preoccupied with granular operations and that all items are technically vetted by the appropriate leads.

3. Responsibilities

A. Clinical Operations Lead / Management

- **ISO Compliance:** Directing clinical operations to ensure 100% compliance with 2026 OSHA, ISO, and HIPAA standards. Responsibilities include rigorous equipment calibration, enforcement of single-patient processing workflows, and the integration of quality management systems to drive organizational development and procedural accuracy.
- **Audit Readiness:** Maintaining organized Trello, Nextiva and Routific records for internal and external ISO audits.

A. Role: Clinical Operations Lead

Team Member: Logistics, Front-end & Support Staff Lead, Healthcare Virtual Assistants Coordinators.

Reports to: CEO (CJ)

Role Mission: To transform "Patient Service" into "Patient Management" by owning the clinical journey, ensuring data integrity, and building the systems that allow Enrich to scale.

Key Responsibilities:

- **Patient Advocacy & Management:** Proactively move patients from initial inquiry to final eye drop recommendation. Ensure no patient "stalls" in the pipeline.
- **The "5 Identifier" Protocol:** Absolute ownership of the 5 Identifiers (Name, Phone, DOB, Address, PID). No chart is released without 100% compliance.
- **Systems Architecture:** Audit current SOPs and write new protocols to eliminate friction. You are the "Policy Writer" for the front end.
- **Logistics Coordination:** Oversee scheduling for phlebotomy technicians and maintain inventory awareness for kits.

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

Clinical Liaison:

- **Provider Communication Loop:** Manage the bridge between the patient and the recommending physician to secure eye drop percentages.
- **Relationship Management:** Proactively build and maintain professional relationships with eye doctors' offices. You are the "face" of Enrich for their clinical staff.
- **New Client Acquisition:** Identify and engage potential new provider partners. Your goal is to make the referral process so seamless that doctors prefer Enrich over any other option.
- **Onboarding:** Facilitate the "New Doctor" setup process, ensuring they understand our "Management" model and how we protect their patients.

B. Role: Enrich Clinical Front-end and Field Technicians Manager

Reports To: Clinical Operations Lead (Rheinalei Aubrey Co, RMT, MLS)

Direct Supervision:

- Ms. Carina Betancourt (Logistics & Patient Support Lead)
- Field Technicians "On Deck" (Courier and Blood Draw Personnel)
- Healthcare Virtual Assistants (Part-time)

Role Mission:

To provide high-level management of the clinical and administrative personnel, ensuring that all scheduling and field operations follow the precise "Architect" phase standards set by the Clinical Operations Lead. This manager is responsible for the performance and coordination of both the logistics lead and the frontline field staff.

Key Responsibilities:

1. Front-End Coordination & HVA Supervision

- **Hub Maintenance:** Regularly update and audit the HVA Trello Central Hub to ensure all "tribal knowledge" and new SOP versions are being utilized by the staff.
- **Shift Management:** Monitor integrated time trackers via Clockify to ensure HVAs are meeting productivity targets and following the "Phone-First" outreach strategy.
- **Quality Assurance:** Review patient emails and call logs to ensure the professional tone and "extraordinary care" standards of Enrich are maintained.

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

Phone-First Policy & Call Hierarchy

- **Immediate Outreach:** Enforce the "Phone-First" communication strategy, requiring that all patient interactions and follow-ups are handled via phone calls as the primary method to ensure immediate resolution.
- **Hierarchy of Contact:** Manage the front-end phone call handling duties according to the following escalation path:

Primary Point of Contact:

Ms. Carina Betancourt (Logistics & Patient Support Lead)

Responsible for the initial intake, first-hour callbacks, general inquiries, escalating logistical issues or complex patient support needs.

Secondary Point of Contact:

Clinical Front-end and Field Technicians Manager

Responsible for resolving internal conflicts or high-level patient concerns before they reach the Clinical Operations Lead.

Operational Guidelines & Schedule policy for Phone call handling responsibilities

The Handover Requirement: Every Wednesday afternoon, **Ms. Carina Betancourt** will provide a Proper Endorsement to the **Clinical Front-end and Field Technicians Manager**. This briefing will cover all outstanding phone inquiries and critical field oversight tasks for the remainder of the week.

Rotation Breakdown:

- **Monday – Wednesday:** Carina Betancourt is the strictly designated Primary Point of Contact for all Nextiva lines and administrative oversight.
- **Thursday – Friday:** The Clinical Front-end and Field Technicians Manager takes over primary responsibility for all phone calls and field technician management. **Thursday:** Carina remains available as a secondary contact to support the transition.
- **Friday:** Ms. Rheinalei will provide secondary support and direct guidance to the Manager to ensure all clinical and field operations run smoothly. She will provide high-level oversight and guidance. She will step in as the secondary point of contact for complex issues or when the Manager is handling multiple active line

NOTE: Please note that these current assignments Friday phone call handling responsibility for the clinical operations lead are temporary. Once the part-time Health Virtual Assistants (HVAs) are onboarded, they will assume responsibility as the secondary point of contact for all incoming calls on Fridays.

The information is intended to be for the addressee only. If you are not the addressee, any disclosure, copying, distribution, or use of the contents of this message is prohibited. If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

2. Leadership & Personnel Supervision

Support Lead Management: Provide direct supervision and guidance to **Ms. Carina Betancourt**, ensuring that Logistics and Patient Support staff are aligned with the latest SOP versions.

Field Technician Oversight: Manage all "On Deck" technicians, ensuring they follow the strictly enforced **1-hour blood draw buffers** and regional scheduling blocks (SoCal Tue-Thu / Alternating NorCal).

Staff Accountability: Review team performance via Clockify, Routific and Trello to ensure the "Phone-First" strategy and documentation goals are being met by all direct reports.

3. Operational Hub & Manual Compliance

Trello Governance: Work with Ms. Rheinalei (Clinical Operations Lead) to ensure the HVA Central Hub remains a "seamless streamline" of the most current company forms and guides. *EVERY DOWNTIME PERIOD*

Standardization: Assist in the implementation of the 100% documented Operational Manual, ensuring that "tribal knowledge" from both the field and front-end is continuously maintained with timely progress for company's professional outgrow and integrity.

4. EOD every FRIDAY Reporting to Clinical Operations Lead (Rheinalei)

- **Manual Progress:** Report on the status of documentation for the 100% Operational Manual goal for their respective direct supervision.
- **Escalations:** Note any requests for scheduling outside regional windows that require mandatory approval from the CEO, sir CJ. or any concerns regarding the ongoing workflow along the process.
- **System Revisions:** Document any "chaotic" revisions or adjustments made to the strategic proposal during the shift.

The Management & Guidance Relationship

The **Clinical Front-end & Field Technicians Manager** serves as the "Driver" and administrator. Under this supervision and guidance, **Ms. Carina Betancourt** will lead the execution of logistics, ensuring field technicians and staff are aligned with our "Architect" phase goals.

5. Operational Standards (The "Architect" Phase)

Under the Manager's guidance, the Logistics Lead will enforce tribal knowledge for fully documented SOP adhering the company's documentation stamps for all documentations circulating in company's system:

- **The 1-hour Blood Draw Buffer** for Technicians.
- **The 2-hour Delivery Buffer** for Couriers.
- **The "Customer-First" Entry:** Adding the customer in the system before an order is generated in Routific.

Quick reference:

To ensure a "seamless streamline" and avoid overstepping, please use the following hierarchy for all operational hours. Task / Scenario	Primary Contact	Secondary Contact
Incoming Patient Calls / General Support	Ms. Carina Betancourt (Logistics & Patient Support Lead)	Front-end & Field Tech Manager (The Driver)
Route Adjustments / Buffer Issues	Ms. Carina Betancourt	Front-end & Field Tech Manager
Front-End Patient Concerns / Conflicts	Front-end & Field Tech Manager	Clinical Operations Lead (Rheinalei)
Strategic Revisions / "Tribal Knowledge"	Clinical Operations Lead (Rheinalei)	CEO (CJ Johnson) — <i>Vetted Only</i>

Patient Coordinators (Intake & Scheduling)

- **HIPAA Stewardship:** Collecting and securing PHI (Demographics and Doctor Info) in a compliant manner.
- **Financial Integrity:** Accurate processing of payments on the day of service and clear communication of the **48-hour Appointment Policy**.
- **Documentation:** Attaching all relevant Care Instructions and Patient Guides to the electronic record.

C. Role: Logistics & Patient Support Lead

Team Member: Full time/Part-time Coordinator

Reporting Line: Reports to Front-end & Field Technicians Lead and Clinical Operations Lead (Rheinalei)

Role Mission: To ensure the "back-end" engine of Enrich runs without friction, focusing on fulfillment, scheduling, and documentation accuracy.

1. Patient Processing & Documentation

- **File Completion:** Reviewing all patient charts post-intake to ensure all required medical forms and consent documents are signed and uploaded.
- **Data Entry Audit:** Cross-referencing the "5 Identifiers" provided by Rheinalei with the laboratory or clinic portals to ensure 100% data alignment.
- **Post-Draw Uploads:** Managing the scanning and filing of patient-signed documents and shipment tracking numbers.

2. Supply Tracking & Ordering

- **Inventory Management:** Conducting a weekly "Friday Audit" of kits, vials, and shipping materials.
- **Procurement:** Initiating orders with vendors to ensure stock never falls below a 14-day "Safety Level."
- **Logistics Tracking:** Monitoring outgoing and incoming kits to ensure they reach the processing center/patient on schedule.

3. Patient Scheduling & Coordination

- **Calendar Management:** Serve as the primary lead for phlebotomy scheduling, orchestrating technician rotations and patient appointments to ensure optimal clinic flow
- **Confirmation Loop:** Manage the 24-hour patient reminder loop through [Platform] to maintain high attendance and operational efficiency.
- **Conflict Resolution:** Lead the escalation process for missed appointments, providing immediate rescheduling solutions and maintaining real-time accuracy of the master calendar.

4. Patient Follow-up Assistance

- **The "Nurture" Loop:** Executing routine follow-up calls or messages to patients who have received their kits but have not yet scheduled a draw.
- **Post-Service Satisfaction:** Checking in with patients after their clinical session to ensure they have no outstanding logistical questions.

ENRICH ADVANCED EYE CARE
PRP Autologous Eye Drops & Serum Autologous Eye Drops

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

5. Social Media & Reputation Management

- **Content Design:** Use Canva to create branded posts for FB, IG, and GMB based on the CEO's monthly educational themes.
- **GMB (Google My Business) Oversight:** Monitoring and responding to reviews. Ensuring business hours and contact info are always accurate.
- **Community Engagement (FB/IG/X):** Monitoring comments and Direct Messages (DMs) daily. Answering basic logistical questions and escalating clinical inquiries to Rheinalei.
- **Content Scheduling:** Executing the posting schedule provided by the CEO/Marketing. Ensuring all platforms are updated at least **3x per week**.

6. Primary Billing Specialist

Financial Integrity & Payment Processing

- **Sole Stripe Administrator:** Serve as the exclusive authority for all Stripe transactions, ensuring maximum data privacy and financial accuracy.
- **"Big Four" Verification:** Enforce a strict "Look Twice, Click Once" protocol, verifying all critical data points prior to processing to eliminate non-refundable transaction fees.
- **Correction & Reconciliation Management:** Act as the sole point of contact for processing refunds, credits, and adjustments to maintain perfectly balanced financial records.

Operational Continuity & Handover

- **Pipeline Management:** Orchestrate the "Clear the Queue" procedure before scheduled absences, ensuring all pending verified bills are finalized to prevent operational bottlenecks.
- **Strategic Briefing:** Provide comprehensive "Special Cases" documentation for the Secondary Biller, detailing pending credits, custom pricing agreements, and high-priority accounts.

Quality Assurance & Auditing

- **Post-Leave Compliance Audit:** Conduct a rigorous spot-check audit of transactions processed during absences to ensure 100% adherence to company accuracy standards.
- **Process Governance:** Maintain and uphold billing security protocols, serving as the final line of defense against manual entry errors and financial discrepancies.

Pre-Handover Checklist (Carina's Responsibility)

Before going on leave or taking a scheduled day off, the Primary Biller must:

- **Clear the Queue:** Process all pending "Big Four" verified requisitions in Stripe.
- **Status Update:** Send a brief summary to Rheinlei (and cc: Management) noting any "Special Cases" (e.g., pending credits, custom pricing, or patients waiting for insurance authorization).
- **Access Verification:** Confirm Rheinlei has active login credentials for Stripe and the CRM to avoid "locked out" delays.

7. Physician outreach Secondary point of contact

Strategic Physician Outreach & Escalation

- **Senior Escalation Authority:** Serve as the secondary point of contact for physician outreach, resolving complex clinical or operational inquiries that exceed the standard coordinator scope.
- **Institutional Knowledge Lead:** Leverage "Day 1" expertise to ensure all information provided to clinical partners is 100% accurate, consistent, and process compliant.
- **Quality Governance:** Act as the final check for sensitive provider communications to maintain Enrich's reputation for professional excellence.

Clinical Relationship Management

- **Provider Communication Loop:** Orchestrate the critical "Bridge" between patients and recommending physicians to secure precise clinical data (e.g., eye drop percentages).
- **Partnership Stewardship:** Maintain the long-term stability of existing provider relationships through expert problem-solving and consistent engagement.

Growth & Provider Onboarding

- **Process Optimization:** Refine the referral workflow to be so seamless that Enrich becomes the preferred choice for clinical partners over all other options.
- **Professional Onboarding:** Facilitate the "New Doctor" setup process, ensuring partners fully understand the Management model and the patient protection protocols in place.

Roles: Healthcare Virtual Assistant Coordinator

Reporting Line: Reports to Logistics, and Patient support Lead

Role Mission: The primary goal of this role is to ensure medical mobile units are in the right place at the right time, while making sure every patient file is legally compliant, and every patient feels well-prepared.

❖ **Healthcare Virtual Assistant Coordinator (Full time)**

Daily Routine & Key Responsibilities

1. Data Integrity & HIPAA Compliance

Core Responsibilities :

The "Big Four" Safety Audit - You are responsible for the 100% accuracy of every medical request. You must verify and crossmatch the following four critical data points:

- **Patient Identity:** Confirm the Full Name matches the record exactly.
- **Verification:** Ensure the Date of Birth (DOB) is accurate to prevent identity mix-ups.
- **Product Specification:** Validate the Product Type against the physician's request.
- **Dosage Precision:** Double-check the Percentage/Strength of the product for clinical safety.
- **HIPAA Stewardship:** Handle all Protected Health Information (PHI) with the highest level of confidentiality.
- **Record Security:** Maintain and secure medical records according to federal HIPAA standards to prevent data breaches.
- **Compliance Monitoring:** Ensure that all communication and data handling workflows remain within legal privacy frameworks.

2. Smart Scheduling Coordinator

Core Responsibilities

Your job is not just to book appointments, but to **build clusters**. We measure your success by how much time the technician spends helping patients versus sitting in traffic.

- **Identify the "Anchor":** Look for the first appointment booked in a specific neighborhood. That is your Anchor.
- **Build the Block:** Fill the rest of that hour with patients who live within 5–10 minutes of that Anchor.
- **Stop "Point-to-Point":** Do not book a patient in the North at 9:00 AM and a patient in the South at 10:00 AM.
- **80% Patient Time:** Technicians should spend the majority of their shift inside homes/clinics.
- **20% Drive Time:** Total driving for the whole day should be less than 1.5 hours for an 8-hour shift.

ENRICH ADVANCED EYE CARE

PRP Autologous Eye Drops & Serum Autologous Eye Drops

If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

- **Density Management:** If you see a "gap" in the schedule that requires a long drive, call the patient and offer a time that fits into a closer "cluster."

3. Patient Concierge & Education

Core Responsibilities

You are the voice that explains the science. You make sure the patient knows exactly what they are paying for. Because we go to the patient, you must manage their clock and their home environment.

- **Clarify the Service:** Clearly explain the difference between treatments so the patient isn't surprised.
- **The "Prep" Call:** Tell them how to get ready (e.g., "Drink plenty of water 2 hours before we arrive for your PRP draw").
- **The Arrival Window:** Never promise a "sharp" time. Always give a 30-minute window (e.g., "Expect us between 10:00 AM and 10:30 AM") to account for traffic.
- **Set the Scene:** Remind the patient to have a clean, quiet space ready for the technician.
- **The "Traffic" Update:** If the tech is more than 10 minutes late, you must call the patient first so they aren't left wondering.

Preparation: Call or message patients to explain their upcoming service (e.g., explaining the difference between Serum and PRP).

Expectation Management: Since this is a mobile service, you'll help patients understand arrival windows and what to expect when the technician arrives at their door.

4. Real-Time Field Oversight

Core Responsibilities:

You aren't just watching a map; you are managing a timeline. When things go wrong in the field, you are the first person to fix it. You are the bridge between the **Field (Tech)** and the **Patient**.

- **Monitor Progress:** Check in on the technicians throughout the day. Watch the mobile app to ensure technicians are hitting their "milestones" (starting travel, arriving, completing the service).
- **Traffic Watch:** Keep an eye on local traffic. If a major accident happens, proactively tell the technician to take a different route.
- **The "Check-In":** Ensure technicians "Check-In" when they arrive and "Check-Out" when they leave every home.
- **Technician Support:** If a technician can't find a house or a gate code doesn't work, you call the patient to get the info immediately so the tech doesn't waste time.
- **Emergency Re-Routing:** If a technician's car breaks down or they have a personal emergency, you are responsible for calling the remaining patients to reschedule or move them to another tech.

ENRICH ADVANCED EYE CARE

The information is intended to be for the addressee only. If you are not the addressee, any disclosure, copying, distribution, or use of the contents of this message is prohibited. If you have received this electronic message in error, please notify the sender immediately and destroy the original message and all copies.

- **Problem Solving:** If a technician is stuck in traffic or running behind, you step in to adjust the schedule and update the patient.
- **The "On My Way" Alert:** Send a quick text to the next patient when the technician leaves their current appointment.
- **Delay Management:** If the tech is running more than 10 minutes late, call the patient before they have to call us.

5. Lab Liaison (The Specimen Manager)

Core Responsibilities

The job doesn't end when the blood is drawn. You must track the sample until the lab confirms they have it.

- **Sample Coordination:** Act as the bridge between the field and the lab. If a label is wrong or a sample needs to be dropped off urgently, you coordinate the fix.
- **Drop-off Confirmation:** Ensure the technician drops off samples at the lab by the daily cutoff time.
- **Shipping Manifests:** Create and double-check shipping labels in the proof of delivery section in the route manager platform. A wrong label means a lost sample.
- **Tracking Orders:** Monitor it until the status shows "COMPLETED".
- **Missing Info Fixer:** If the lab calls saying a tube is missing a signature or a Date of Birth, you fix it immediately by contacting the tech or checking the patient's record.
- **Result Monitoring:** Keep a "Pending Results" log. If a lab result is taking too long (e.g., more than 48 hours), call the lab to find out why.
- **Specimen Integrity:** Verify that the tech has logged the correct temperature or storage method for the sample before shipping.

6. Physician Outreach Coordinator

Core Responsibilities

As the first point of contact for the outreach program, this role serves as the primary liaison between the organization and external medical professionals. The coordinator ensures seamless communication and high-level service delivery by managing all incoming inquiries and routine correspondence.

- **Inbox Management:** Act as the primary gatekeeper for the Physician Outreach email account, ensuring all messages are triaged, flagged for urgency, and addressed within established SLAs.
- **First-Touch Communication:** Serve as the initial point of contact for physicians and medical staff, providing professional and timely responses to inquiries.
- **Routine Correspondence:** Draft and distribute standardized communications regarding program updates, onboarding materials, and general announcements.
- **Inquiry Resolution:** Resolve routine questions independently and escalate complex clinical or administrative issues to the appropriate department lead.

- **Database Maintenance:** (Optional/Suggested) Track outreach interactions and update contact records based on incoming communications to ensure the CRM remains current.

OSHA & Workplace Safety

- **Ergonomics:** As this role is primarily administrative/virtual, workstations must adhere to OSHA ergonomic standards (proper chair height, monitor leveling) to prevent musculoskeletal disorders.
- **Emergency Protocol:** The Scheduling Coordinator is responsible for maintaining an up-to-date patient manifest in the event of a facility evacuation or emergency.

Compliance & Quality Control

Standard	Application in this Role
ISO 9001:2015	Continuous improvement of scheduling workflows via monthly "No-Show" data analysis.
HIPAA	Encryption of all Patient Health Information (PHI) during physician outreach.
OSHA	Reporting of any workplace hazards or repetitive strain injuries within 24 hours.

Documentation Requirements

- **Daily:** Appointment Audit Report.
- **Weekly:** Physician Outreach Progress Log.
- **Monthly:** Quality Metrics Review (ISO Compliance).

Note: Any deviation from this SOP must be documented and reported to the Clinical Operations Lead for review.
